5/11/2016:

Mr. Steve Tool:

With regard to California VOC compliance, as it pertains to Slocum's product number S5413 (formerly S5998A), we believe the correct category for the product under Rule 1168 is "Special Purpose Contact Adhesive". A definition follows:

Special Purpose Contact Adhesive- A Contact Adhesive that is used to bond all of the following substrates to any surface: melamine covered board, metal, unsupported vinyl, Teflon, ultra-high molecular weight polyethylene, Rubber and wood veneer 1/16 inch or less in thickness.

It is our understanding that S5413 (formerly S5998A) will be used to bond metal to rubber and rubber to concrete, therefore, is entitled to this exemption. This category allows products to contain up to 250 g/L. S5413 (formerly S5998A) contains 246 g/L.

Note: S5998A was a lab number for this product. The production number has now been changed to S5413. They are exactly the same formula.
